LANDSCAPE WARRANTY AND GUARANTEE

The health of your landscape plants is going to depend largely on the care they receive. Trees, shrubs, perennials and flowers should be watered adequately during the first year. A simple moisture test is to place your finger just under the soil to feel the amount of moisture in the soil, water plants 15 – 20 minutes as needed. It is possible for newly installed landscape plants to suffer transplant shock, particularly during the hot summer months. It is crucial that plants receive proper care at this time to minimize stress.

Preferred Landscapes, Inc. guarantees our plants to be true to name, alive, healthy and currently inspected by the Michigan Department of Agriculture.
